About Us

Khosla Filters is India's leading manufacturer of speciality Filter fabrics. The company is Asia's only producer of speciality filter fabrics having fully integrated operations right from fibre/chips to finished made-ups. Today Khosla Filters has state-of-the-art plants at Wada (near Mumbai) manufacturing a wide range of filter fabrics for Indian & international markets.

Khosla Filters is a trusted name in the Indian industry and exporting to more than 50 countries around the globe, meeting requirements of diverse industries such as Drugs & Pharmaceutical Chemicals, Dyes & Pigment, Metal & Mining, Food, Sugar, Edible Oil, Paper, Ceramic, Clay, Starch, Breweries, Chemicals, Waste Water Treatment, Cement, etc.

Khosla Filters is equipped with the most modern manufacturing equipment in Spinning, Twisting, Warping, Weaving, Needling, Finishing & Stitching machines of leading international brands. The research & development wing ensures that manufacturing of superior and high performance filter fabrics is an ongoing process at Khosla Filters. An ISO 9001:2015 & OHSAS 45001:2018 company certified by DNV and HSC systems.

Khosla Filters holds a competitive edge with its filter fabrics, produced under strict quality controls confirming to international standards. Over 4 decades of manufacturing experience enables Khosla Filters to offer customized fabric solutions to suit every industry need. With an extensive sales support and large international client base, Khosla Filters today enjoys a formidable name in Filter fabric industry around the world.

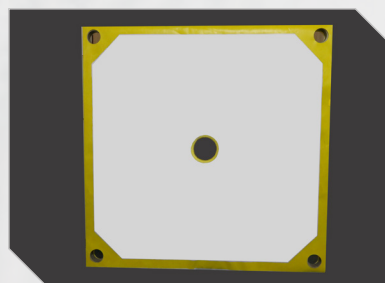

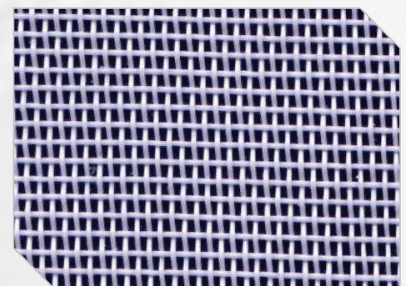

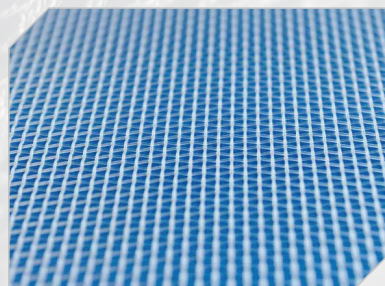

Monofilament Fabrics

Khosla Filters now offers a complete range of advanced Monofilament Fabrics in single and multilayer weave design. Monofilament Fabrics are the first choice of the filtration industry globally, due to their inherent advantages over conventional fibres.

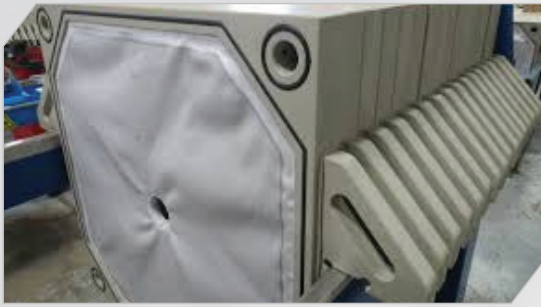

Khosla Filters has installed a complete state-of-the-art manufacturing plant for producing modern monofilament filtration fabrics - a first for India. As a pioneer of filtration fabrics in India, Khosla Filters is the first company in India to impart a unique surface finish to its monofilament fabrics. It is proud to make this technology available to its customers in the Indian subcontinent & around the world.

Special Features

- Better flow rate, low moisture content
- Uniform pore size distribution across the fabric
- Easy to clean and reuse the fabric due to special surface treatment
- Excellent strength and nil elongation

Fabrics for Modern Filtration Equipment

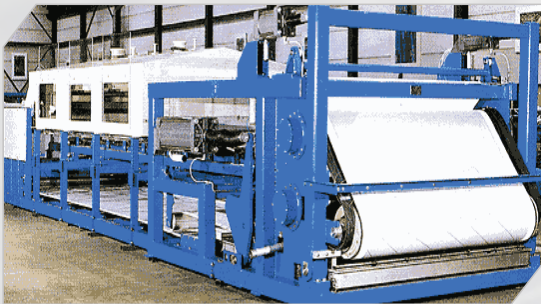

Membrane Filter presses

- Fabrics for High pressure filtrations, squeeze pressure upto 18 bar and backwash pressure upto 90 bar
- Specially suitable for automatic filter presses
- Nil Elongation & quick cake release

Vertical Tower Press

- Only Indian company manufacturing fabrics for Vertical Belt Filter for high pressure filtration
- Ready to use belt with clippers and edge treatments
- High strength low elongation
- Outstanding abrasion resistance
- Wide range of fabric designs are available for individual industry and applications

Horizontal Belt Filters

- Introduction of indigenously manufactured Monofilament Belt Filter Fabrics
- Specially Finished to withstand high stress and easy cake discharge
- Ready-to-use Belts are available including Double layer weave Fabric with options of Zipper, Clipper, Ultrasonic Welding, etc.

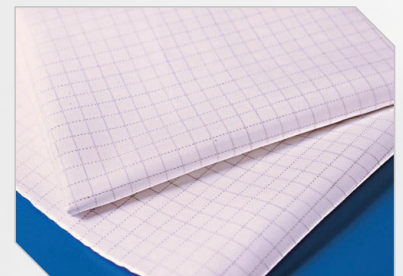

Anti-Static Fabrics

Khosla Filters offers special Antistatic Fabrics for meeting industrial safety needs. Our Antistatic Fabrics are used in fluid bed driers, centrifuge bags, filter presses, dust collection systems, etc.

Manufactured with hi-tech anti-static fibre / yarn, our Antistatic Fabrics meet the most stringent standards of quality to eliminate the static charge. They are available in a range of fabrics like Polyester, PP, Nylon, & Cotton with SS Fiber or Carbon blended yarn.

Advantages of Anti-static fabrics

- Helps in dissipating static electric charges in flammable processes
- Fibreless finish for drugs & pharma industries to meet US FDA and safety standards
- Tested by Static Meter and reputed laboratories
- Available in fabric and ready made-ups as per customer requirements
- Epitropic fabrics for highly sensitive filtration environment also available

Food Grade Fabrics

Anticipating the changing needs of customers, Khosla Filters has indigenously developed filtration fabrics to cater to the challenges posed by an increasingly dynamic market. Compliance with US FDA standards has become almost mandatory for bulk drug manufacturing companies catering to the export markets.

Recognising the need for quality filters that meet international standards, Khosla Filters uses special raw material to develop new varieties of fabrics, which comply with FDA standards including US.
